Milestone 3

Team: Dragos Surugiu, Claudiu Negru

Current Development Stage:

- Still need to make P2P logic work and to add minor details to frontend; everything else is done

Deployment:

- Two client instances are deployed locally
- WebRTC Signaling Server is deployed locally (only for the presentation)
- Backend Server is deployed locally (only for the presentation)
- Database is deployed on a NAS

Team Involvement:

- Dragos: Frontend, Rust Backend Server, WebRTC Signaling Server, NAS setup
- Claudiu: Frontend, CRDT algorithm, Database design
